Contents

Preface xiii

Contents xv

Scaling behavior in economics: The problem of quantifying company growth
L.A.N. Amaral, S.V. Buldyrev, S. Havlin, P. Maass, M.A. Salinger, H.E. Stanley and M.H.R. Stanley 1

The repton model of gel electrophoresis
G.T. Barkema and M.E.J. Newman 25

Aspects of vapor adsorption on solids
D. Beaglehole 40

Microscopic and mesoscopic simulation of entropic micelles
P.G. Bolhuis and D. Frenkel 45

Compaction of granular mixtures: a free volume model
T. Boutreux and P.G. de Gennes 59

Formation of mesoglobules from phase separation in dilute polymer solutions: a study in experiment, theory, and applications
K.A. Dawson, A.V. Gorelov, E.G. Timoshenko, Yu.A. Kuznetsov and A. Du Chesne 68

Anisotropic fluctuations and stability of ordered phases in diblock copolymer systems
R.C. Desai 81

Layer growth in collapsed liquid crystal monolayers studied by scanning force microscopy
J. Fang, C.M. Knobler and H. Yokoyama 91

Probabilistic approach to the Widom–Kadanoff scaling relations
R.A. Ferrell 99

A contrast in kinetics of gravity controlled wetting
C. Franck 106

Studies of binary liquid mixtures in cylindrical pores: phase separation, wetting and finite-size effects from Monte Carlo simulations
L.D. Gelb and K.E. Gubbins 112

On foldable protein-like models; a statistical-mechanical study with Monte Carlo simulations
M.-H. Hao and H.A. Scheraga 124

The nonuniform Wertheim Ornstein–Zernike equation: Density profiles and pair correlation functions of a dimerizing hard sphere near a hard wall
D. Henderson, O. Pizio, S. Sokolowski and A. Trokhymchuk 147

Local contacts of membranes and strings
C. Hiergeist and R. Lipowsky 164

SCOZA for *D*-dimensional spins
J.S. Høye and G. Stell 176

Scaling properties of passive scalars in one dimension
L.P. Kadanoff, S. Wunsch and T. Zhou 190

Jumps in electric potential and in temperature at the electrode surfaces of the solid oxide fuel cell
S. Kjelstrup and D. Bedeaux 213

Strong, weak and metastable liquids
H.N.W. Lekkerkerker 227

Theory of gel electrophoresis in high fields: Evolution of a population of hernias
D. Long and J.-L. Viovy 238

Wavelet transformation of protein hydrophobicity sequences suggests their memberships in structural families
A.J. Mandell, K.A. Selz and M.F. Shlesinger 254

The internal 'slithering' dynamics of supercoiled DNA
J.F. Marko 263

Phase transitions in the multicomponent Widom–Rowlinson model and in hard cubes on the bcc lattice
P. Nielaba and J.L. Lebowitz 278

Renormalization of nonlocal degrees of freedom
B. Payandeh and M. Robert 285

Vapor–liquid equilibria, scaling, and crossover in aqueous solutions of sodium chloride near the critical line
A.A. Povodyrev, M.A. Anisimov, J.V. Sengers and J.M.H. Levelt Sengers 298

Attracting spheres: Some early attempts to study interparticle forces
J.S. Rowlinson 329

Near-critical liquid/liquid interfaces of simple and complex mixtures probed by ellipsometry
J. Schulz, A. Hirtz and G.H. Findenegg 334

Relaxation of Ising models near and away from criticality
D. Stauffer 344

Negative thermal expansion in the Gaussian core model
F.H. Stillinger and D.K. Stillinger 358

Protein adsorption on tethered polymer layers: effect of polymer chain architecture and composition
I. Szleifer 370

Phase diagrams and interfacial properties of nematic liquid crystals
M.M. Telo da Gama 389

On exact solutions to the cylindrical Poisson–Boltzmann equation with applications to polyelectrolytes
C.A. Tracy and H. Widom 402

Noise in the current through a membrane
N.G. van Kampen 414

Interface potential for nucleation of a superconducting layer
J.M.J. van Leeuwen and J.O. Indekeu 426

Spinodal decomposition under confinement
C. Varea, J. Campos-Terán and A. Robledo 440

Electrolytes confined to a plane in the Debye–Hückel theory
E.S. Velázquez and L. Blum 453

Intermolecular forces and the structure of uniform and nonuniform fluids
J.D. Weeks, K. Vollmayr and K. Katsov 461

Tetracritical and novel tricritical points in a model magnet
J.C. Wheeler and P. Pfeuty 476

Sources of ocean island basalts: A review of the osmium isotope evidence
E. Widom 484

Chromosome structure and gene regulation
J. Widom 497

Repton model of gel electrophoresis in the long chain limit
M. Widom and I. Al-Lehyani 510

Living poly(α-methylstyrene) near the polymerization line. 6. Chemical kinetics
J. Zhuang, S.S. Das, M.D. Nowakowski and S.C. Greer 522

Benjamin Widom – Curriculum Vitae 536

Publications of Benjamin Widom 538

List of contributors 543
